TITLE: DIFFERENTIAL PERMEOMETER Customer No.: 27162

Commissioner for Patents
Washington, D.C. 20231

**DECLARATION IN SUPPORT OF REQUEST RECONSIDERATION
OF PETITION UNDER 37 CFR 1.47(A)**

Sir:

I, the attorney of record, hereby declare as follows:

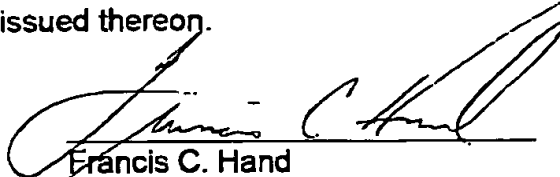

On May 2, 2002, I received an email (copy attached) from one of the named inventors, Burt Swersey, providing information as to the whereabouts of the non-signing inventor, Elias Kaplan.

On May 2, 2002, I submitted four (4) emails to Mr. Kaplan (copies attached) enclosing a copy of the patent application as filed, a Declaration of inventorship and an Assignment form for execution.

On May 13, 2002 the executed Declaration was received by facsimile from Elias Kaplan and is being submitted herewith.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment or both under Section 1001 of Title 18 of

the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Hi Burt,

How are you? We are doing fine after a couple of moves. Meantime in 4 years we have been in Troy, NY and now Seattle (Redmond). My daughter Carol (5th grade) just finished her first invention, a device aimed to help turn book pages, we looked at the Lego kit you told me about, but a science fair rule was avoid using expensive kits, maybe in the future.

We build our won stuff using a couple of small electric motors, a board and other junk, bought some stuff at hobby store as well.

She used a light arm built on balsa wood and rubber articulation, a string to lift the end part of the arm (hand operated meantime), a hand held vacuum cleaner to suck the page through small tube and sucker. It's kind of working, although it lacks automation and vacuum, was mostly her job, I tried to help as less as possible. I'll send later a couple of pictures.

I would like to know what's the status on the permeometer patent, last time we spoke, a couple of years ago, I had to leave for Uruguay for a while for family matters and couldn't get into the last stages of the patent application, I would like to get my name added to the patent if still possible. I'd like to grant my earnings from the patent to the Invention Studio new projects in case there is some potential customers, I know that marketing the patent is as hard as to get the device working though.

Best regards to your wife, happy pesaj.
